

FYI

FRONT YARD INITIATIVE

Facts & Figures

20,438.73

FYIers remove excessive pavement and replace it with green space to take pressure off our stormwater system and reduce street flooding. To date, we have removed **20,438.73 SF** of paving.

33

FYI provides visible examples of green infrastructure in the urban environment that serve as models and inspiration for future efforts throughout the city. **33 yards** have been transformed thus far.

\$178,856

Going gray to green creates demand for qualified professionals to provide landscaping and paving removal services. FYI has generated **\$178,856 in economic stimulus** to the green sector to date.

30

FYI grows the city's professional capacity in the green sector in partnership with contractor and youth training programs. We have reached **30 workforce development opportunity youth** to date.

101

We hosted **7 workshops** and reached **101 interested FYI clients**. After the August 5th flooding, we received an additional **54 inquiries** about going gray to green.

236

This year, we educated **236 residents** at outside speaking events. At the UC, we focus on educating the community about excessive paving, green infrastructure and what plant species are best suited to our climate.
